

# CHAT-BOT

USING HTML,CSS,JS

# PROJECT DEFINITION

## Chat Bot

The chat-bot is specially designed & built for admission related questions regarding our university.

It will help us to provide answers to common admission related questions!

# MOTIVATION & NEED

The main motivation behind developing this chat bot is to reduce human efforts by answering user questions.

It provides the information automatically without human interaction.

It fetches the information stored in backend & present to end-user.

# HOW CHAT-BOT HELPS?

Available 24X7

Automation of Boring Process.

Save a time to get a information.

Reduce human interference.
